SpeaktheScience.com

PROFILE: *I am a highly skilled problem solver and scientific storyteller with expertise in guiding professional audiences through a broad spectrum of biomedical content. From clinical trial materials to scientific advances, I can swiftly grasp and communicate complex information across various biological and medical specialties. With a keen eye for clarity, I excel at editing content to produce deliverables that communicate clearly with your target audience.*

MAJOR ACHIEVEMENTS:

- Founded a freelance writing business crafting highly researched health education materials, clinical trial results, and scientific news coverage
- Penned and defended a doctorate health science thesis
- First-authored two peer-reviewed original research scientific manuscripts

COMMUNICATION EXPERIENCE:

Science Communicator, Speak the Science LLC

May 2020 – Present

- Produces medical, pharmaceutical, popular culture, and scientific research content for online publications
- Conducts high-level medical and pharmaceutical literature research and analysis for health communication
- Advances an ambitious production schedule with multiple contributors and media companies
- Collaborates closely with clients to set project objectives, devise effective strategies, and define a clear scope of work ensuring the timely and successful production of high-quality deliverables

PhD. Candidate, Academic and Technical Presentations

Aug. 2012 – Dec. 2019

- Used critical thinking and analysis skills to manage cross-department research projects including literature review, funding procurement, data collection, and analysis
- Published and presented original biological research findings at multiple academic meetings in written, visual, and oral presentations
- Awarded numerous government research grants including NIH's National Research Service Award Grant
- Mentored numerous students through scientific protocols, study design, and thesis writing

Community Organizer and Editor-in-Chief of Online Newsletters

May 2014 – May 2018

- Organized and moderated an event calendar of scientific seminars, workshops, networking and professional development opportunities
- Lead a writing team focusing on content management and optimizing alumni donor engagement
